

**PROBLEMS OF INCREASING THE INTELLECTUAL CAPACITY OF WOMEN AND GIRLS
IN THE RENEWING UZBEKISTAN****Tursunbayeva Nargiza Komiljonovna****ASSISTENT of Nukus State Pedagogical Institute named after Ajiniyaz. Republic of Uzbekistan**

Increasing the socio-political and social activity of women in our country, for them to realize their abilities and potential in different fields and sectors to create conditions, to ensure unconditional observance of rights and legal interests, comprehensive support of motherhood and childhood, as well as the institution of the family extensive work is being done on strengthening.

Each period has its own development factor, need, demand and life principles. Naturally, their formation and development give them a special meaning Consecration, during this period, the activity of the state, community life, socio-political institutions is clear there will be huge historical events that determine the directions. Uzbekistan to independence from the first steps to protect women's rights after achieving one of them is Article 46 of the Constitution of the Republic of Uzbekistan: "Women and girls and men have equal rights" - was recognized. With this, women in our country As an active member of the society, it is legal to participate widely in all spheres guaranteed [1].

Today, under the leadership of our President, we are taking bold steps towards building the foundations of the Third Renaissance in New Uzbekistan. At this point, it should be said that the new Renaissance depends, first of all, on the development of science and the strength of national spirituality. Deeply aware of this acute reality, our state is creating new opportunities for women to engage in education and science. In particular, with the decree "On measures to further accelerate work on the systematic support of family and women" in 2022-2026, the National Program for increasing the activity of women in all aspects of the country's economic, political and social life and the National Program for 2022-2026 A comprehensive action plan aimed at implementation in 2023 was approved.

In order to inspire all women in the society to science, a new mechanism - "Society of Women Scientists" has been established, and the news that 50 billion soums will be allocated from the state budget to support and further stimulate its activities, makes all women want to become "women scientists" in the hearts of all women. It is true that it will increase even more. These reforms, as our President noted, are a sign that the truth, which has been formed in our nation since time immemorial, "If you educate one girl child, you will educate the whole family", is literally being expressed today.

Nowadays, the place and role of women in the world is increasing is rising. This situation is reflected in the political, social and economic situation of many countries of women who are active in key areas of economic life can be seen in the increase in number and weight. Women and girls world-renowned politician as an equal member of society, their own as scientists, artists, athletes, entrepreneurs and managers, they are showing what they are capable of. In some cases their activity, knowledge, perseverance, strength and show that he is not inferior to men in his responsibility it is not necessary to prove that they did it.

Today's women's adaptation to the political life is theirs in neighborhoods, various political institutions, political parties, public civil organizations, such as non-governmental non-profit organizations is being formed and developing within the institutions. It is different conducting events of social, political, spiritual importance, the participation of women in them, having their opinions, most of all the important thing is to understand the political processes and, as a result, their it should be said that the political level and business outlook have increased.

The intellectual potential of women and girls is his the possibility of generating ideas, innovations in the processes of socio-economic development input and move forward with it is to create conditions for Technological process educational, scientific (new knowledge) and technical (discoveries, construction) activity of a person man-made civilization provided by in the field of science and technology use of capital, scientists, engineers, designers, technicians, higher the activities of skilled workers material production is becoming a decisive factor in the development of production and social sphere.

Also, the intellectual potential of women is systematic is a property, and many ways of its detection and has different levels. Man is intellectual the essence of the potential of the intellect – vital interaction between activity and intellect – personality disclosure based on dependency analysis possible. It is a person's individual, personality and activity is formed and accumulates during its development as a subject [2].

It should be noted that the intellectual potential is very high is a meaningful and rather complex concept. Before him, the category of social knowledge not as, but in many cases used in another sense, i.e. as a metaphor. Now the situation has changed. In the post-industrial world has a high intellectual potential that is recognized as an integrative whole countries are leading.

Modern women today is perfect and mature women in every way compared to, it is:

- mother and housewife who have their place and status in the family;
- a qualified leader with modern knowledge and skills;
- active politician;
- an entrepreneur, for example, was a separate part of the class of owners farmer;
- a teacher who brought up a perfect generation;
- a scientist who served the country's development;
- like a doctor who has a special place in the healthcare system embodies qualities
