PLANNING OF INITIAL TRAINING IN EDUCATIONAL INSTITUTIONS BEFORE CONVOCATION

Tavakalov Alisher Akbaralievich

Tashkent State named after Nizami

faculty teacher of military education of Pedagogical University

Annotation: Initial training of young people until the call-up - growing is a component of education of the coming and forming young generation. It helps the student to develop a high ideological, political and moral character, to behave himself, to pass the service in the ranks of the Armed Forces flawlessly, to fulfill the necessary physical and practical training standards for the defense of the country, to protect the Motherland and the commonwealth of other countries in order to fulfill the sacred duty of protection, to exert pedagogical influence on consciousness, will, mental and physical development, organizational involves a goal-oriented and continuous process. It will be discussed about the planning of initial training in educational institutions before convocation.

Keywords: training, educational institutions, convocation, defense, generation, pre-service military education, student, professional competence

"Preliminary training of young people before conscription" Uzbekistan .It is a component of preparation for service in the Armed Forces of the Republic, general education and secondary special vocational education is a compulsory subject for educational institutions is to ensure that the constitutional duty is performed perfectly and that the modern combat weapons and military equipment assigned to him are mastered in a short period of time. In giving military training to young people, they should be given exercises, actions and it is planned to train as closely as possible to the combat training activities of the troops in the military units. In order to implement this work, departments of public education, secondary special vocational training institutions must ensure the organization and conduct at a high level. The importance of the military leader in the military and the professional aspect level of training, pedagogical skills, methodological skills, also directly depends on ideological and political maturity. To perform such a task is only possible with an excellent training system and methodology, effective means of education, well-organized leadership on a scientific basis and primary training of young people before the draft is provided the process is carried out by the military leader and CHTO according to the YOCHQBT program and the orders of the Ministry of National Education, Higher and Secondary Special Education, Ministry of Defense, normative documents and educational methodical recommendations planned and organized. The thematic plan defines the following: the distribution of study time by classes, the sequence of learning classes, educational and educational goals of the class, students' independent tasks for preparation, titles of literature, as well as methodological instructions and interrelationship with other subjects. Thematic plans are drawn up by the military leader, CHTO for all sections of the YOCHQBT program. The main task of the YOCHQBT program that students should acquire determining the optimal amount of knowledge, skills, qualifications, spiritual-political and professional-combat qualities. According to our ideology, didactics is a complex socio-pedagogical aspect of student education considers as a process. The main tasks of the process are the following:

- General education (students with knowledge, skills, qualifications arming);
- Educational (a person needed by the future Defender of the Fatherland formation of qualities and qualities of a military team in students);
- Developer (in solving the problem that arises formation of students' creative approach skills);
- Psychological preparation (successful in modern battles formation of students' psychological readiness for actions).

In the implementation of this task, their limitation is unity important for a comprehensive approach to student training is a huge factor. For this purpose, to activate students' cognitive activities it is necessary to apply guidelines for the effective use of more advanced educational methods based on Traditional methods of practical education according to the "telling - showing - practicing" scheme and cannot ensure the fulfillment of the basic psychological conditions.

As practice shows, the quality of the student's preparation. In addition to increasing the efficiency, applying new methods to the educational process and having a deeper educational impact on the students will ensure the effective preparation of the students. An important area of improvement of the educational process is the military combine the theoretical rules of the work to the maximum practical activity is to approximate. That is why it is necessary to create conditions corresponding to a real combat environment in the training process. The effectiveness of the educational process depends on the quality of educational tools is directly related. Educational tools include textbooks, training manuals, printed and distributed materials, slides, slide films, film materials, video materials, multimedia, electronic textbooks, magnetic phonograms, natural includes exhibition tools, posters, simulators, etc. Part of this requires the use of technical equipment. Creation of scientifically-based means of education is one of the important directions of scientific-research work in an educational institution.
