## WAYS TO IMPROVE THE PROFESSIONAL COMPETENCE OF STUDENTS OF MILITARY EDUCATION BEFORE THE DRAFT

**Valiyev Sarvar Abdusalomovich**

Tashkent State named after Nizami

faculty teacher of military education of Pedagogical University

**Annotation:** The professional competence of students studying in the field of pre-vocational education is their work on themselves, their striving forward in their direction. In order to develop competence, first of all, it is necessary to establish a practical and theoretical process, to carry out large-scale work in this regard.

**Keywords:** education, pre-service military education, student, professional competence, competence

Currently, it is necessary to develop drastic changes in the field of education in order to develop the professional potential of students studying in the field of military education. In particular, in the field of military education, it is appropriate to provide military educational and technical resources, to organize lessons with military weapons in a practical manner, to organize systems deepened in the internal field of military education in a broad field. Designing the educational activities of students of the "military education" direction is largely related to determining the pedagogical conditions for the organization of the educational process, studying the implementation of these mechanisms based on the analysis of research conducted in the world and in our republic. "liq. Designing the educational process is a purposeful educational activity specially organized by the teacher to ensure the student's independent actions from searching for a problem, planning and organizing activities to solve it, and ending with public evaluation. A mature specialist in the future. High professional potential and human qualities, as well as loyalty to the Motherland, in order to deeply instill in their hearts and minds that the defense of the Motherland is an honorable and sacred duty, the educational material presented in the content of the training courses taught to the students studying in the field of military education before the draft is of special importance. Implementation of practical processes of students studying in the field of military education not only in school institutions, but also in special military units can give its results. At the same time, it is very appropriate to organize a special day in cooperation with the Ministry of Defense on one day of the week and organize special preparations, trainings, practical exercises and debates with them on these days. A student who has studied regularly with military-technician, military weapons, even if he works as a pedagogue in a school in the future, can give students enough theoretical knowledge about military potential and can apply it in practice. How can a teacher of the subject of social science and technology develop his professional potential and what can be done in this regard? In this regard, first of all, it is appropriate to start practical activities and implement them on the basis of a plan. The faculty prepares highly qualified specialists who teach the subject of "Primary training before the draft" in academic lyceums, vocational colleges and general secondary schools of our republic in the field of "Military education until the draft". is coming. Military training of OTM students is organized in order to prepare reserve and reserve officers for the Armed Forces of the Republic of Uzbekistan. Theoretical and practical exercises, training camp, final state certification are held in military training units. and consists of complex measures that are implemented in the process of taking the oath to the Motherland. Male students studying in the full-time department of OTM undergo military training. .Primary training of young people before the call-up - growing and is a component of education of the young generation that is being formed. It helps the student to develop a high ideological, political and moral character, to behave himself, to pass the service in the ranks of the Armed Forces flawlessly, to fulfill the necessary physical and practical training standards for the defense of the country, to protect the Motherland and the commonwealth of other countries. In order to fulfill the sacred duty of protection, it embodies a pedagogical influence on the mind, will, mental and physical development, an organizational goal-oriented and continuous process.

Educational subjects such as "Primary training before conscription", "Education in the spirit of military patriotism", "Fundamentals of military legislation" and social and humanitarian subjects: "The idea of national independence and the foundations of spirituality", "History of Uzbekistan", "Ethics", "Ethics", and the essence of educational courses are aimed at the growth of the political level of students and young people, the formation of worldviews, the correct assessment of international political events in the past and the present. , teaches a conscious attitude to the problems of social, economic, cultural development of the society. It was confirmed on the basis of experimental lessons that in the teaching of these academic subjects, it is of great importance to strengthen students' enthusiasm for education and knowledge, to teach them to work independently, to develop a sense of national pride and universal dignity. and by designing the educational activities of the students of the "Military education up to the call-up" direction, in their future professional activities, on the basis of professional competencies, they will have such qualities as understanding of social and political events, dedication to the defense of the Motherland, and loyalty to the national ideal. is developed and is manifested in their social competences. All this in didactic content shows the need to prepare students of the "Military education before the draft" for the educational process based on project technology. These competencies are a component of socio-cultural competencies. Their development will be the basis for students to successfully carry out their professional activities in the future.

To sum up, many measures are being taken in the development of the military sector. At the same time, it is appropriate to focus on increasing the practical activity of military faculty students in order to improve their professional competence. The training of highly professional, devoted and brave military personnel who are devoted to military and patriotic duty is one of the most important conditions for protecting the independence and territorial integrity of the Republic of Uzbekistan. large-scale work was carried out in the field of personnel training. Adoption of the concept of educating young people in the spirit of military patriotism, strengthening of cooperation with local state authorities to ensure the unity of the army and the people, made the ranks of our national army strong-willed and have an active civil position. allowing to fill up with young people.
