

**METHODOLOGY FOR THE DEVELOPMENT OF INFORMATION
AND COMMUNICATION COMPETENCE IN THE PROCESS OF
DISTANCE LEARNING OF STUDENTS IN THE MODERN
EDUCATIONAL ENVIRONMENT****Nigora Sharapova****ANNOTATION**

At present, a large volume of education is being directed to the educational system in our country investments are the ground for Uzbekistan to rank among the most advanced countries creating. In particular, modernization of the material and technical base of higher educational institutions to 2011-2016 on making and radically improving the quality of specialists more than 277 billion sums of money for the implementation of the intended program orientation is envisaged.

Education model of Uzbekistan meets the most modern requirements not limited to the establishment of its institutions, this model is above all, to quality, that is, teachers, students, students, curriculum and ultimately it is based on improving the quality of knowledge. It is also associated with globalization this educational model, developed taking into account the needs

The fact that Uzbekistan occupies a worthy place in Asia, in general, in the world community serves as a means of supply.

Today in our republic there are 1396 professional colleges and 141 academic lyceums, 59 higher educational institution, 11 regional branches of higher educational institutions in the capital and 6 branches of leading foreign higher educational institutions operate. In this area effective international cooperation is widely established, our national education model is high another confirmation of the orientation towards the training of qualified personnel.

President of the Republic of Azerbaijan on May 20, 2011 "higher education institutions material and technical

strengthen the base and radically improve the quality of training of highly qualified specialists resolution " on measures to improve higher education

institutions modernization, their implementation with modern educational and scientific laboratory equipment providing, raising the educational process to a qualitatively new level, advanced pedagogical introduction of technologies and forms of training, labor of teaching staff based on the strengthening of incentives, the economy is in demand in the spheres and sectors goals of radical improvement of the quality of training of specialists with higher education covered.

21st century before humanity as an age of intellectual potential, thinking and spirituality with the opening of New-new horizons, even sharp problems that we have not seen before, have not encountered causing. From educators, to young people in today's difficult time, in the spirit of the Times in addition to teaching, tomorrow of humanity, our motherland and our people thinking of his day, calling young people to goodness, righteousness, kindness and tolerance it is also required to carry out educational work aimed at achieving.

According to the views decided in the East regarding the human mind, the mind is of two types, namely natural and it will be professional. Natural intelligence is an innate gift to man. Professional intelligence while studying, getting knowledge and gained thanks to experience. Honorable and painstaking as the formation of professional intelligence it is the educators who are assigned the task. "Turkish" By Abdullah Avlani There are such sentences in the chapter "zamani of upbringing "in the book" Gulistan or morality".

"It became clear that it was necessary to start upbringing from the date of birth, to give our body strengthen, radiate our thoughts, beautify our morals, make our mind it is necessary to clarify. Who does the upbringing, is it registered?- the question will come.

To this question "first-home education. This is the main task. Second-school and madrasah upbringing, this is the task of the father, teacher, mudarris and the government," we answer. Exactly these schools and madrasas were taught both before and now by teachers-educators increased.

The adoption of the National Personnel Training Program in our country and this quality and effectiveness of education as a result of reforms carried out on the basis of the program sharply increased. The material and technical bases of educational institutions have been strengthened. That it can be said with satisfaction that the introduction of the modern educational system is today the day is giving positive results. Now, the task of us educators is modern technical innovation education at the level of requirements in educational institutions with provision it is necessary to provide education and training to our youth on the basis of technology.
