By the decree of the president of the Republic of Uzbekistan, intensive work is being carried out on popularization of physical education and sport in our state, creation of necessary conditions and infrastructure for healthy lifestyle among population, especially youth, ensuring worthy participation of the country in international sports fields. At the same time, a number of systemic problems and shortcomings in the organization of physical education and sports are hindering the effective implementation of the state policy in this regard, the full use of the existing sports potential of our country. In particular: firstly, the lack of an effective system of management of physical education and sports, especially in places, does not ensure the proper coordination of the activities of government agencies and other organizations in this regard, the formation and promotion of a healthy lifestyle, and secondly, the lack of an effective and transparent system of selection (selection) among young people in the;

On the other hand, it is gratifying that in the current year more than 20 documents on the sphere are the orders and decisions of our President. This is also evidenced by the attention of our state to the development of Physical Culture and sports. Because of the reforms carried out under the leadership of the president of our country, quality changes in the sphere were noticed. In the past period of this year, our athletes won 483 gold, 394 silver, 536 bronze medals, a total of 1 thousand 413 medals at local and international sports competitions. International competitions were successfully held in our state. In

May, our athletes won gold in one of the ten weight categories at the Asian BOCS Championship held in Tashkent. At the meeting, special attention was paid to the issues of training qualified personnel and trainers for the sports sphere. The head of our state fulfilled certain tasks on training, retraining and professional development of personnel in the field of physical education and sports. The main place of knowledge in this regard was transferred to Chirchik, the Uzbek State Institute of physical education. As a result, the Institute acquired the necessary infrastructure for training and training of qualified athletes and coaches, created an opportunity to restore a modern sports town. The Center for scientific-methodological provision, retraining and professional development of specialists in Physical Education and sports was established at the State Institute of physical education of Uzbekistan. At the center so far, more than 800 employees have improved their qualifications. At the meeting, instructions were given on further improvement of the Institute's activities, introduction of new innovative technologies into the educational process, Organization of special laboratories for scientific research. It was noted that it is necessary to turn the Institute of physical education into a modern sports educational institution, to create a program for 2018-2020 years based on the organization of educational programs on the achievements of modern science. The decision of the president of the Republic of Uzbekistan “on measures for the further development of Physical Education and mass sports” in June of this year was another important document in the field. With this decision, a program of further development of physical education and mass sports was adopted in the Republic of Uzbekistan. Within the framework of the program, about 154 children's playgrounds have been renovated in the current year, about 233 modern playgrounds have been commissioned in Nukus city to use specialized sports complex for the Olympic and national types of sports. In particular, from the funds of the children's Sports Development Fund, it was criticized that the construction and reconstruction of 39 sports facilities were behind the schedule,

and the equipping of swimming pools with modern equipment was delayed. To eliminate these shortcomings, assignments were given for the completion of construction work before the end of the year. It was noted that it is necessary to increase the effectiveness of the use of sports complexes, to attract young people to them more widely. It was criticized that the cooperation of sports schools, higher schools of sports skills of the Republic and sports federations in the field of youth discovery, selection work is not carried out at the required level. In this regard, instructions were given to create a clear transparent seal and cover all regions.

Certain measures have been taken to achieve greater success in other potential sports such as gymnastics, trampoline, and athletics, taekwondo, kayaking and canoeing, cycling, among others. It was mentioned that it is necessary to strengthen cooperation with international sports federations. In the resolution of the president of the Republic of Uzbekistan “on the wide involvement of the athletes of Uzbekistan who achieved high results in prestigious international sports competitions in public and sports affairs, as well as on the promotion of athletes and their trainers” on August 10, this year, it is worthy of attention that the stars of our sport and their This document provides an opportunity for further improvement of the system of material stimulation of athletes and coaches in Uzbekistan, making a worthy contribution to the preparation of a reserve of athletes who successfully participate in prestigious international competitions. The sides also discussed the work of the lower sections of the state program on physical education and sports, the involvement of all segments of the population in sports, the development of the private sector in the field and other pressing issues.

CONCLUSION

In conclusion, I can say that in the recent years, changes in the sports sector are developing rapidly and I know that this is the result of the right policies of our compatriots.
