

THE IMPORTANCE OF VOCABULARY IN LANGUAGE LEARNING AND HOW TO BE TAUGHT

Inobat Ilkhomovna Rasulova.
Teacher of the English Department.
Samarkand State University named after Sharof Rashidov.

Abstract. Increasing vocabulary is an important part of the language learning process. Today there are a number of innovative ways to increase vocabulary. This article discusses ways to increase vocabulary and importance of it.

Keywords: vocabulary, activity, game, language, method, communication.

In a nutshell, vocabulary is important because it's the basis of all language. It's the raw building blocks that we can use to express our thoughts and ideas, share information, understand others and grow personal relationships. Even if we barely know a language and have zero grasp of grammar, we can still communicate (although we might end up sounding like cavemen!)

For example, pointing at a chocolate pastry in a French bakery and saying the few words 'pain au chocolat' with a friendly smile is just as likely to result in a tasty breakfast as uttering a grammatically perfect sentence. It would be nice to have both, of course, but it's not essential. Vocabulary knowledge is perhaps the most important factor when it comes to reading comprehension, both for native and non-native speakers. For example, if you sit down to read a book and you don't know the vocabulary used, you'll struggle to understand the meaning of the text. You might end up looking up the words in a dictionary, guessing the meaning of the words from their context, or you might simply give up and find something else to read. This can be disappointing, disheartening and also shatter your confidence.

This connection between vocabulary size and second language attainment has been widely researched over the years. A robust vocabulary improves all areas of communication — listening, speaking, reading and writing. Vocabulary is critical to a child's success for these reasons: Vocabulary growth is directly related to school achievement. The size of a child's vocabulary in kindergarten predicts the ability to learn to read.

Vocabulary knowledge is perhaps the most important factor when it comes to reading comprehension, both for native and non-native speakers. For example, if you sit down to read a book and you don't know the vocabulary used, you'll struggle to understand the meaning of the text. You might end up looking up the words in a dictionary, guessing the meaning of the words from their context, or you might simply give up and find something else to read. This can be disappointing, disheartening and also shatter your confidence. This connection between vocabulary size and second

language attainment has been widely researched over the years. In case you're a local speaker, you've likely experienced a time when a specific word is 'on the tip of your tongue' but you're incapable to keep in mind it. It can be baffling and regularly cut the discussion brief.

It works in a comparable way for a moment dialect learner who hasn't learned that particular lexicon word within the to begin with put. In case they don't know (or can't keep in mind) that piece of lexicon, they will be incapable to totally express their message.

For this reason, information of vocabulary is broadly considered to be maybe the foremost pivotal component when it comes to person's capacity to talk a outside dialect
