

VISITING TOURISM OF UZBEKISTAN

Oripov Ahmadjon

ANNOTATION. On the territory of Uzbekistan, like other religions, there are many sacred places related to Islamic culture and its Sufi flow. The most valuable monuments are recognized as UNESCO's all-round heritage sites.

Key words: Islamic culture, considered the homeland, monuments

Among them is the city of Bukhara, which is called Bukhara-Sharif, which means blessed Bukhara in the Islamic world. The city of Samarkand has many invaluable monuments. The city of Shakhrisabz, considered the homeland of Amir Temur. Of course, these cities have an ancient and rich history and have undergone serious changes all their life.

Eternity, the idea of Eternity is a connection with these cities. There is a story in the biography of the Prophet Muhammad. The prophet is the norm. He had a heavenly horse, and he rises to heaven on that horse. First he visits Jerusalem, then Mecca. Looking at Mecca, he sees that the sun's rays illuminate the whole world. Then he sees only two points on the Earth, these rays rose from the bottom to the top. These rays were Bukhara and Samarkand.

The emergence of Christianity in Central Asia is associated with the names of the apostles Foma and the first-called Andrei, who at the beginning of the first millennium served as missionaries in this region.

Since then, the two most important religions in the world - Islam and Christianity-have been living peacefully together. There are more than 10 holy and revered Christian and Muslim places and places of pilgrimage in Uzbekistan.

Until now, on the territory of Uzbekistan there are "Springs of Iowa", which both Christians and Muslims respect, the most famous of which is located in Bukhara.

Directly, the Orthodox Church in Uzbekistan began to take shape with the emergence of the Russian Orthodox Church in Central Asia, after the main part of this region was annexed to the Russian Empire and along with the establishment of the Turkistan general-governor's office (1867).

In 1968 year on the territory of the ancient Termez was found a Buddha statue, and since then this place has become the main object studied by many archaeologists. Later, the complexes of the oldest Buddhist temples were opened: Fayoztepa (BC. the hunt. 1-th century BC 3-th century), Kampirtepa, Karatepa. The discovery of the

elements of the Ayritom Frieze, famous for the image of ancient musicians, indicates that Buddhism was propagated on the territory of this region, and the elements of the ellinistic culture were revealed. Now the Terracotta barrels of the embroidered border are kept in the State Hermitage in St. Petersburg.
