Abstract: This article analyzes the literature and implementation of methods in the world to improve the competencies of conducting sports competitions and refereeing among students in the higher education system by combining technologies of student-centered learning and cooperation.

Key words: sports competitions, refereeing competences, facilitation, reform, education, physical education, personality, pedagogical skills.

In the present era of globalization, sports are one of the leading factors in the development of countries and increasing their national prestige at the international level. Physical culture plays an important role in people's health and ensures production and labor productivity. Cultural changes, industrialization and urbanization processes taking place in the world are one of the factors that ensure the growth of sports. That's why today many developed countries are developing their strategies for the popularization of physical education and sports. In particular, the International Olympic Committee and the International Sports Organization (FIFA) are conducting consistent activities for the development of sports in developed and developing countries. In particular, these include increasing the role of physical education in protecting the health of the population, developing the competences of holding and refereeing competitions in sports, standardizing the methodology of sports games, and organizing systematic sports competitions.

The role of physical education in human health in the scientific research centers and universities of countries such as the USA, Great Britain, France, Germany, Italy, Spain, Brazil and Japan, the wide use of sports in establishing a healthy

lifestyle among the population, organization of sports competitions and standardization of competition conditions, organization of international sports competitions and expansion of the ranks of countries participating in them, training of personnel in the field of physical education and sports, development of competences of conducting and refereeing competitions in sports Scientific research is being carried out.

During the past 30 years of independence, Uzbekistan's international reputation is increasing due to the successful participation and prize-winning positions of the athletes of our country in the Central Asian and Asian Games, various international tournaments, world championships and the Olympic Games. These achievements in sports led to the growth of our people's sense of identity, solidarity and patriotism. The head of our state Sh. Mirziyoyev said, "We are proud of our athletes who have made a great contribution to increasing the prestige and reputation of Uzbekistan on international sports fields. At the same time, we should not limit ourselves to the achievements in high-level sports, we should also pay great attention to mass sports" shows that special attention is being paid to the development of mass sports among the population in our country.

Today, after the independence of Uzbekistan, the sports sector has been given a lot of attention not only to introduce the country to the world, but also to strengthen the health of our people and raise a healthy generation. The question of the future of the nation has always depended on the development of the next generation that the society is raising. For this reason, the development of physical education and sports in our country, conducting sports competitions in the credit module system and improving refereeing competences of students is an important task for the state.

The aim of the work is to improve the pedagogical conditions for the development of facilitator competences in the credit module system.

Task of the work:

Analyzing the possibilities of improving students' sports competitions and refereeing competencies in the credit module system;

The object of the work is the process of developing the competences of conducting sports competitions and refereeing among students in the Credit module system.

The subject of the work is the content, form, methods and means of improving the competences of conducting sports competitions and refereeing among students in the credit module system.

Used methods. The research used comparative-comparison, pedagogical observation, survey, interview, questionnaire, test, interview, pedagogical experiment and mathematical-statistical analysis methods.

The scientific significance of the results of the research is that the meaning of the concept of "professional competence", "competencies of holding and refereeing sports competitions" has been revealed, the criteria and indicators of the technology of developing professional competence based on the competences of conducting and refereeing pedagogical sports competitions among students have been clarified, It is determined by the fact that the content of the development of the competence of conducting and refereeing sports competitions by means of role-playing and business technologies has been clarified, and the content of the technology of the development of competence development of sports competitions and refereeing among students has been improved.

The practical significance of the results of the research is that the role and importance of business technologies in the development of the competences of

conducting sports competitions and refereeing among students is empirically based, the development of the module of the competences of conducting sports competitions and refereeing among students, the possibilities of developing the professional competence of students in physical education and pedagogy are highlighted; it is explained by the improvement of the process of development of sports competitions and refereeing competences.

Conclusion: It should be noted that for the effective implementation of the reforms in the educational system, it is important to develop the pedagogical skills of the physical education teacher, in particular, the competence of conducting sports competitions and refereeing. In this regard, although the scientific research works on the training of physical education teaching specialists have been sufficiently researched in our republic, it is observed that the issues of holding sports competitions and forming the competences of referees have not been specially researched. Accordingly, in the conditions of the current educational reforms, there was a need to create scientific research works on the training of physical education teaching specialists. Especially in this regard, the problem of forming the competences of a physical education teacher to hold sports competitions and judge becomes more important. From this point of view, the research topic we have chosen is very relevant.
